Novin Sepehr Sanyar Company

Novin Sepehr Sanyar Company started its activity in 2009 in Isfahan by importing food, medicine and cosmetics raw materials. With the aim of supplying raw materials for food, pharmaceutical and cosmetic industries, the company has succeeded in establishing close cooperation with the medical community, health professionals and manufacturers of related industries, and has a major share of domestic market imports. Novin Sepehr Sanyar Company, with its increasing expansion and development in the field of its activities, has been able to expand its activity in the production and customization of raw materials in the form of outsourcing, in addition to imports. Using global management standards and customer-oriented principles, the company has established a reliable bridge between industries and...
