

Tarh Sanat Engineering Group started in 2011 with the aim of providing suitable quality home appliance parts for the use of home appliance manufacturing companies as well as spare parts market and by producing key parts of water coolers such as shaft, bearing , Floats and plastic parts, straw catchers, straw and bush blower, has made this effort. Although the aim of this unit is to increase the product portfolio as well as production circulation, but it always prefers quality over quantity. In addition to the production of parts and services mentioned above, this unit, using the experiences of home appliance industry experts, is ready to provide advice and engineering services in connection with the preparation of maps, development and optimization of production and inspection methods and...
