

Since there are abundant mineral raw materials and petroleum and petrochemical raw materials in the country, the preparation and production of high value-added products from these materials, in addition to saving and optimal use of materials, is an important step in creating employment and localization. The long-term familiarity of the company's founders with the country's industries, as well as their research background, led them to meet the country's need for specific products that are difficult to procure from abroad and with The price was very high, they started to establish this company in 1397. Due to the decades of knowledge and experience of the founders of the company from the chemical and metallurgical industries and their needs, it caused that in a short time after the e...
