

The knowledge-based Roshana Ab Avosh company, realizing the challenge of providing the necessary water for various uses in the coming decades and the great importance of the ability to purify water and wastewater in the country, and relying on the knowledge of local experts who graduated from the country's top universities, took action has set up a production unit for water and waste water purification materials, focusing on various grades of polyaluminum chloride coagulant (PAC). In 2019, after 2 years of research and development, this company succeeded in obtaining the technical knowledge of polyaluminum chloride production in a completely local way. Then he designed and built an industrial unit for the production of polyaluminum chloride with a nominal annual production capacity of...
