Green industry of Tabaristan

Sanat Sabz Tabaristan Company was established in 1380 by some experienced experts interested in the country's industry with the aim of manufacturing and supplying all kinds of solvents and chemicals. The production of high quality products made it possible to export an important part of its products to neighboring countries in addition to the supply of products in domestic markets. In parallel with the production activities, this company carries out its activities in the field of import and export of products and raw materials, providing commercial services, fulfilling orders, including the technical knowledge of production of various products, contract production of products, recovery, dewatering of solvents, etc. expanded
