

In the years after the revolution and the war, everything changed. The old and tumultuous ways of elimination, and new projects with new definitions, became the topic of today's world, global technology was rapidly changing, electronic circuits and microprocessors, which had not been out of the scope of books before, came into production. The shape, weight, and price of electrical equipment changed rapidly, and the issue of protecting equipment, which until then had not gone beyond the category of human lives, became a capital issue, big investments that went up in the air with every electrical disturbance, such as lightning, sudden and uncontrolled voltage intrusion, and the lack of an engineered earth. In the beginning of 2015, Tesla Sanat Sepehr, with the aim of dealing with the above i...
