

With increasing efforts, we are pursuing the development of products for people who care about their nutrition and value their health. We want our products to be the guests of valuable family tables and consumers to know our products as healthy and natural products. Dembaz's motto is to revive the palm groves and save the date industry. Relying on the perseverance of Kharmaban Joub Group and the expansion of research and development of new date products, the basket of new products has started to produce products such as berry juice, grape juice and three juices (mulberry, grape, date).
