

Mad Plast

Madplast company was established in 1378 in order to produce and meet the country's needs, by importing various types of covering sheets (upvc) with a nominal capacity of 3000 tons, and until today, it is proud to be a part of major organizations, departments and projects, including power plants and research institutes. has played a role. Madplast products are produced under the supervision of experienced and creative work managers and are presented for consumption after the final testing and approval stages by the relevant laboratories. Madplast defined a new range of specialized services in order to achieve organizational and national goals while maintaining the features of differentiation in comparison with other competitors, Madplast company had to revise its mis...
