Industrial use

Sincerely, Behkarsanat Radmehr Company (former Techno Avran) has been established with the aim of designing and producing industrial machinery for tanks, including flour and sugar silos, liquids, powder and chemical materials, granules, animal and poultry feed, to serve our dear compatriots. One of the features that always attracts attention in the design of this company's products is the use of modern technologies, which aim to meet the industrial needs of the country in the field of storage, transfer and weighing machines, specialized and fully automatic by H.M.I and pl.l.c without the need for warehouse and Manpower is done. In addition, this company is the first producer of waterproof silos (out door) in Iran.
