

Rocha Alborz Sanat Sepahan Company

Rosha Alborz Sanat Sepahan technical engineering company started its activity in 1389 and with the reverse engineering of the cranes made in Bulgaria, it achieved significant success in the field of localized production of Bulgarian design cranes. This made the production of cranes to be on the agenda, and for more than 12 years now, this company has experience in the construction and production of all types of overhead cranes. It has REMOTEX exclusive brand. This company, under the management of Mr. Mojtabi Azizi, along with the engineering and executive knowledge of its managers and the experienced and trained executive staff specializing in the field of manufacturing and production of industrial parts and moving equipment (cranes), in order to provide quality services and products and b...
