

PRODUCT CATALOG

FERROZONIX

Providing customized and computational solutions to optimize production lines. We don't sell equipment, we design efficiency. We specialize in designing and developing equipment that are the main arteries of your production line: Material transfer: screw conveyor (U and tubular), belt conveyor, elevator bucket. Feeding and dosing: types of feeders for accurate injection of materials into the process. Mixing and processing: industrial mixers, pulpers and granulation systems. Consulting and design: providing executive drawings, technical calculations and reliability based design product.

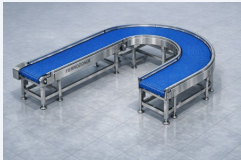

MACHINE MANUFACTURING

Screw Conveyor

A screw conveyor is one of the most important material handling equipment in various industries, used for transporting powdery, granular, gr...
