Providing international capabilities
in design, manufacturing and
mechanical solution

The world is changing, but our values are not.

We are a fast growing company with the aim of producing high quality server cabinets for the local markets. Now as we are expanding our operation, we are ready to serve international markets specially Middle East and Gulf Region.

Our corporate philosophy focuses on R&D and QC because we truly believe the customers need and requirements change day by day so we have to be agile enough to respond to these needs in a timely manner.

We believe that customer is our No.1 priority and we put that in to practice. So we are 100% committed to the quality and meeting our customers' requirements`

Brief Company Overview

Limited Liability Company | Registration Number: 444987|

With the vision of becoming one of the leading sheet metal forming manufacturer in Iran, Mahan System was established in 1998. Since then the company has been growing by becoming more and more customer-oriented meeting the ever-changing requirements of its clients. Being able to offer customized solutions to various industrial groups, the company has diversified into various commercial divisions each specializing in specific area. Being highly price and quality competitive, Mahan System has been able to compete effectively with local and foreign rivals, being able to take a sizable local market share. As part of its expansion plan, «The Global Reach», the company has started its overseas operation by Registering a Georgian Branch in 2017.

Quality Policy

With 15 years of experience, the company is able to provide defect free products and quality services which conform to international standards, and customer specification.

The stringent quality inspection program conducted by highly skilled technical staff assures of the quality presented to the customers in addition to the quality machinery used such as CNC punch and bending, and others.

Quality has never been compromised, and that has been the reason behind the company success, and its fast growing company base.

Our services

Mahan System Co. provides various electronic boxes such as:

- Telecommunication Cabinets
- Indoor and Outdoor Racks
- Wall Mount Enclosure
- Kiosks
- ATM and TVM
- Others including: Battery Cabinet, Medicine Racks, Open Racks, Automobile accessories,...

Operating Divisions:

Engineering & Technical Div. (R&D)

This division is responsible for design and development of new cabinets based on new industry trend and also providing customized solution based on customer exact requirements

Commercial Div.

The commercial division taps on highly qualified sales and marketing staff familiar with domestic and overseas sales and trade transaction. Moreover, the division is responsible for liaising with current customers to find out more about possible issues and recommendations for future improvement, and also seek new markets for future expansion.

The division's core philosophy is that **"Customer is our number 1" Priority**

Planning & Quality Control Div.

Continuous programs are provided to various divisions based on their specialty and immediate need, ensuring the quality operation of the company as a whole. The manufacturing personnel also go through special machine operation and safety training courses. Bringing the staff up-to-date has allowed the company not only to experience rapid growth but also be able to retain its most valuable asset, meaning its skilled staff.

Personel training

Continuous programs are provided to various divisions based on their specialty and immediate need, ensuring the quality operation of the company as a whole. The manufacturing personnel also go through special machine operation and safety training courses. Bringing the staff up-to-date has allowed the company not only to experience rapid growth but also be able to retain its most valuable asset, meaning its skilled staff.

Production site

The 4000Sq Meter factory located in KhoramDasht Industrial City with 75 people is well equipped with state-of-the-art machineries such as bending, CNC punching, spot welding and others. Moreover, the highly trained and skilled labor force has ensured the optimal quality desired by the industry, in addition to the production efficiency achieved. The production process is based on stock-to-order and make-to-order to fulfill the immediate and special need of the clients.

Washing section

All of the accessories washed with warm water and mild liquid detergent – followed by a fresh water rinse to maintain the attractive appearance of the powder cured film. Therefore the coated surface is free of oil-grease-dust mill and metal oxides.

Painting site

Optimal painting is attained by using special Convection oven, and electrostatic spraying. Skillful workforces are used in the painting site to achieve the highest quality and required thickness.

Laboratory system

Our experts in the laboratory use the best scientific method for reaching the best possible painting and washing solution by using special high tech painting equipment like convection oven and other needed equipment and facilities.

Assembly Line

All the products are assembled by skillful staff with special care, making sure the final product would be flawless of defects. The products are packed carefully in Bubble Nylon or carton, and put on pallets for transportation to any parts of the world

LION Wall-mount Rack

▲ IP20

LION Server Rack

Material

SPCC cold rolled steel.
Thickness : 1.5 and 2 mm
Color:RAL9004

RAL9004	RAL9002	RAL7035
		

Feature

- High density vented front door and double section vented rear doors
- Capability of opening the doors from right or left
- Cable entry on the top and bottom cover
- Capability of mounting side-by-side with related mounting kit
- Front door and rear door with 75% perforated
- Removable side panels for easy maintenance
- Earthling system between main parts
- Optional installation of plinth
- Easy disassembling for shipping and storage cost
- IP: 20
- Static loading: 1800Kg
- Electrostatic powder coating
- Comply with IEC297-2

Code NO.	Capacity (Unit)	Width (mm)	Depth (mm)	Height (mm)
MSCR42100	42	600	100	2000
MSCR42120	42	600	120	2000

LION Wall-mount Rack

Feature

- o Double section welded frame structure
- o Easy operation and maintaining at the back
- o 19" standard installation
- o Cable entry at the top cover and bottom panel
- o Capability of fan installation ranges 1 to 2
- o Optional Vented Front Door
- o 4pcs of adjustable mounting profile
- o Electrostatic powder coating
- o Comply with IEC60297-2

Material

SPCC cold rolled steel.
Thickness : mounting profile 1.5mm
Others 1.2mm
Color:RAL9004

RAL9004	RAL9002	RAL7035
		

Code NO.	Capacity (Unit)	Width (mm)	Depth (mm)	Height (mm)
MSC D903	9	600	600	480

Feature

- o Welded frame structure
- o 19" standard installation
- o Glass front door
- o Capability of fan installation ranges 1 to 2
- o Removable side panels for ease of maintenance
- o Cable entry at the top cover and bottom panel
- o Optional vented front door

Material

SPCC cold rolled steel.

MAHAN Racks

19" Racks Series

▲ IP20

Material

SPCC cold rolled steel.
Thickness : mounting profile 2.0 mm,
mounting angle 1.5 mm, others 1.2mm.
Color:RAL9004

RAL9004	RAL9002	RAL7035
		

Feature

- Exquisite design with precise dimension and craftsmanship
- Special durable and secure glass door
- Optional vented front and rear door
- Blue Zinc mounting profiles, free of static
- Adjustable feet and heavy duty castors are both available
- Cable entry on the top cover and bottom panel with adjustable sizes
- Optional plinth for fix installation
- Efficient and reliable assembling and installation with baying kit
- IP: 20
- Removable side panels for ease of maintenance
- Depth: 600mm, 800mm, 1000mm
- Height: 14U up to 47U
- Unique hexagonal reticular high-density vented front and rear door enable equipment protection, ventilation and reliable operation
- High secure locking system against unauthorized access
- Static loading: 1000Kg
- Material: 100% steel frame and panels
- Electrostatic powder coating and zinc plating
- Various optional accessories
- Comply with IEC60297-2

FRONT DOOR

REAR DOOR

Wall Mount Cabinet

Feature

- Capability of fan installing ranges 1 to 2.
- Capability of complete ventilation of the air in the rack.
- Capability of passing cables from the top or the bottom or the sides of the rack.
- Capability of changing the adaptors locations toward the rack depth.
- Capability of opening front door from the left or right side.
- Capability of choosing the front door in from of glass or acrylic.
- Capability of openness and separation of the side doors and complete availability to the rack inner equipments.
- Electrostatic color coverage on all pieces.
- Optional Vented Front Door

Products

▲ Analysis Test

MAHAN RACK

STATIC TEST

- Done with Abaqus software
- Loading 1200kg
- Checking pressure on the plates and profiles

Result: Up to 1200kg can be loaded in Mahan racks without any deformation of the structure

DYNAMIC TEST

- Done with Abaqus software
- Applying horizontal and vertical force
- Check out the rack resistance against vibration with 0.49g horizontal acceleration in 3.35s and 0.31g vertical acceleration in 3.12s

Result: it shows resistance of Mahan racks against earthquake and max. effect is occurred in 3.35s and its 4.3mm

Accessories

The image features the word "Accessories" in a white, sans-serif font on a dark gray background. A thin white line extends from the top left towards the word, and another thin white line extends from the bottom left towards the word. A red arrow points from the bottom right of the word towards a red triangle. Three additional thin white lines extend downwards from the bottom of the word, each ending in a red triangle.

OutDoor Racks

The image features a minimalist design on a dark gray background. A white horizontal line spans the width of the page, with the text "OutDoor Racks" centered above it. Below the line, a series of white lines and a red triangle create a sense of depth and perspective. A red triangle points towards the center, and several white lines radiate outwards, some parallel to each other and others intersecting, suggesting a three-dimensional structure or a specific architectural layout.

OUTDOOR CABINET

Manufactured according to Customers exact drawing and specifications
Strong resistance to ever-changing weather conditions
Degree of protection: IP54

Material :

- Steel sheet .AL.SS.... is optional
- Front door: thickness 2.0st
- Side panel: thickness 1.5st
- Finish : electrostatic powder coating (RAL 7035) is optional
- Easy to assemble due to efficient design
- Damage free transport
- Fixed on palette
- Hot air exchange by side panel ventilators
- Protection category :
IP(isolating protection)=54.
IP standard is according to IEC solutions.

Telecommunication Optical Cabinet

- Easily deploy in rugged outdoor environments with a temperature range from -40°C to 55°C including high humidity
- The sealed cabinets meet IP55 protection ratings, allowing for installation in adverse conditions such as close to salt water and near or in factories
- Thermal design takes different cooling mode such as fan, heat exchanger and air-condition in accordance with different working environment of the cabinet to achieve heat exchange within the cabinet
- Anti-theft design ensure cabinet and equipment's safety

ATM

The image features the letters 'ATM' in a bold, white, sans-serif font. A small red triangle is positioned at the bottom right corner of the letter 'M'. The text is centered horizontally and is partially overlaid by a horizontal white line that extends across the width of the image. The background is a solid dark gray, and there are several thin white lines forming a geometric pattern of triangles and parallel lines.

ATM

Manufactured according to
Customers exact drawing and
specifications (Pro cash)

Cash dispenser

Its successful design blends harmoniously into any environment where effective advice, information and presentation are needed. Modern communications and technology with a new look. Additional installation of a sound system is possible.

Height: 1655.0mm

Width: 790.0mm

Depth: 740.0mm

Capability of using at the banks ,markets

Capability of card reader ,monitor and printer installing.

The bottom mid section is a strongbox and top section is cash dispenser.

Strong box is including of two model door:

Security door with a code lock (thickness 15.0) and perforated door with a cylinder lock (thickness 2.0)

And top section is including one round door with a cylinder lock.

Capability of cable entry at rear panel.

Coating

Electrostatic powder coating (RAL 5007)

All of inner accessories are yellow zinc plated.

Material

Front door , side panels and rear panel are steel sheet (thickness 2.0)

Strongbox is steel sheet (thickness 15.0)

The logo features a small red triangle pointing upwards and to the right, positioned to the left of the word "Kiosk".

Kiosk

Customized Kiosk

Information Kiosk

Free standing, slim and most important with elegant design, Simple, Easy-going, eyeball attracting makes it's the best choice for overall indoor kiosk applications.

Transaction Kiosk

These Series are free standing Transaction Kiosks. The Kiosk can be used for bill payment, e-payment, e-Ticketing, Order entry, Check-In and information checking of Airport, Banking,Transportation,Travel & Tourism, Finance & Insurance, Library, Canteens, Retail Outlets etc.

Advertising Kiosk

Work perfectly to integrate with a bigger size advertising display. Bigger signage LCD Display offers commerce advertisements and convenience for customer collecting information that will easy attract the eyeball of the end user

Telecommunication Cabinet

BTS CABINET

- Total height : 1993.75
- Width: 604.5
- Useful Depth: 392.0
- All of the inner accessories in this rack are zinc plated.
- Use different models of subracks in BTS rack including TRX, MRT and BSC .
- Sliding Sub racks are easy removable and fastening by screw bolt.
- heavy duty steel cross bars are bolted with BTS rated bolts at each edge of corner joints enabling cabinet carry even more static loads.
- All of the accessories can be used with a BTS cabinet. This cabinet provide easy access to equipment via the removable roof , sides and front /rear door.
- Triangular lock insert. The handle can only be locked if the door completely closed.
- Rugged galvanize cases
- Steel reinforce cross bars in each side of the cabinet including top and bottom
- Coating :electrostatic powder (RAL 7035)

19" RACK (TELECOMMUNICATION)

- Light and strong frame
- Depth :600mm
- Height: 40U
- Sufficient ventilation ensures that the equipment
Would not be over heated
- Highly secure locking system against unauthorized
access
- 1500kg static load carrying capacity
(with adjustable feet)
- Standard RAL7032 and various color options
- Thickness: Mounting profile 2.0 mm , mounting
angle
1.5mm , others 1.2mm
- Material: 100% steel frame and steel panels
- Finish: Electrostatic powder coating and zinc
plating

CONTROL PANEL

Manufactured according to Customers exact drawing and specifications (Arian Asansor)
A product of Arian Asansor. First microprocessor control panel manufacture

ETSI Racks (19", 21", 23") /

The ETSI (European Telecommunication Standard Institute) define cabinets for telecommunications applications based on the metric norm.

- This rack define for the telecommunication based on the metric norm.
- This rack offered with standard dimensions of
- length :600.0mm, width 600.0mm,height:2141.0mm(44u).
- Cable entry access panels at top and bottom.
- Rear panel and front door are optional.
- Perforated or glazed metal front door .
- Option: welded frame with the stronger structure.
- Easy customized to individual requirements .
- Easy to assemble due to efficient design .
- Material:
 - Side panel,front column,front door and rear panel supporting thickness are 1.5.
 - Roof and bottom section are 2.0 thickness.
 - Rear panel fastened by screw bolt.
 - Front door lock by triple point lock.
 - Zinc plated or electrostatic powder coated .
 - All round accessibility.

ETSI Racks (19", 21", 23")

- 19" universal whole pattern for front and side mounting of equipment
- Easy cable management through large cut outs in the frame and easy cable conducts by cable clamps mountable on all faces
- Base openings ready for individual positioning of the frame
- Base equipped with feet (standard) or castors (optional)
- Electrostatic powder coating (standard RAL 7032)
- Material: 2mm steel
